SUMMARY

Software Engineer with 4.5 years of experience designing, building, and supporting production systems across financial services and enterprise applications. Experienced in backend architecture, system design, API development, and end-to-end ownership of software solutions from technical design through deployment and production support. Strong focus on building reliable, maintainable, and scalable systems, ensuring data integrity, troubleshooting complex issues, and making pragmatic engineering trade-offs.

EXPERIENCE

Senior Software Engineer

Yodaplus Technologies Pvt. Ltd. **Oct 2025 - Present, Mumbai**

- Architected enterprise financial platforms using .NET and Azure, translating complex requirements for Treasury Management System (TMS) and Credit Limit Framework (CLF) into robust domain models and backend services.
- Engineered secure financial data pipelines handling acquisition, validation, transformation, and reliable distribution across downstream systems.
- Designed and developed REST APIs and backend services with a focus on data integrity, robust error handling, performance, and maintainability, using Azure Service Bus for asynchronous messaging and service integration, supporting decoupled communication.
- Developed full-stack applications using React, TypeScript, and .NET, seamlessly connecting modern frontends with Azure cloud backends and deploying via Azure SWA and Function Apps.
- Wrote thorough unit and integration test suites using xUnit to safeguard domain logic, data layers, and API reliability.
- Owned features end-to-end through the entire lifecycle—from technical design and implementation to automated CI/CD, production debugging, and documentation.
- Accelerated development workflows by leveraging AI-assisted tools for rapid prototyping, code generation, refactoring, and automated testing.
- Developed AI-powered enterprise applications and RAG systems using LLMs, embeddings, vector search, LangChain, LangGraph, tool calling, and guardrails.

Software Engineer

Knight Fintech Pvt. Ltd. **Aug 2023 - Sep 2025, Mumbai**

- Designed and developed two production fintech products: a Loan Origination System covering applicant onboarding, eligibility, and sanctioning, and a Credit Guarantee Platform provisioning lending workflows, rule evaluation, and compliance in the agricultural sector.
- Owned full-stack development across both products, designing domain-driven business workflows, REST APIs, integrations, and data-access layers around core lending and guarantee capabilities.
- Architected and developed the Loan Origination System using .NET Core and ReactJS, hosted via Azure VMs.
- Built the Credit Guarantee Platform using ASP.NET Framework and Razor Pages, scaling across IIS Web Farms, Web Gardens, and ARR.
- Improved product reliability through automated unit/integration testing, CI/CD, production troubleshooting, and performance-focused database optimization.
- Contributed across the full product lifecycle, from requirements and technical design through development, deployment, and production support, while mentoring junior engineers.

Junior Software Engineer

Uneecops Technologies Ltd. **Jun 2022 - Jul 2023, Mumbai**

- Developed and enhanced .NET and AngularJS-based enterprise modules using Dapper/ADO.NET for data access with MS SQL and SAP HANA databases.
- Designed and optimized SQL queries, stored procedures, functions, views, and joins to support reporting, validations, and backend data workflows.
- Diagnosed and resolved production issues across the UI, backend, and database layers by analyzing query behavior, data inconsistencies, and application-flow defects.

SKILLS

Backend Engineering: C#, .NET Core, Python, FastAPI, Microservices, Kafka, Entity Framework Core, API Design

Databases & Performance: SQL Server, PostgreSQL, MongoDB, Redis, Stored Procedures, Views, Functions, Indexing, Query Optimization

Cloud & DevOps: Azure App Services, Azure VMs, Azure Functions, Azure APIM, Azure Storage, Azure Data Factory, Azure Service Bus, Azure SQL, Application Insights, Azure DevOps, Git, Docker

Applied AI & LLM Engineering: LangChain, LangGraph, CrewAI, RAG, AI Agents, Milvus, pgvector, Vector Search, Embeddings, MCP

Frontend & UI: ReactJS, jQuery, HTML5, CSS3, Bootstrap, TailwindCSS

EDUCATION

Bachelor of Engineering

University of Mumbai · Mumbai · 2022
